**METHOD AND DEVICE FOR MEASURING THE INJECTION
RATE OF AN INJECTION VALVE FOR LIQUIDS**

REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance:

Claim 15 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method for measuring the injection rate of an injection valve for liquids, comprising the steps of:

determining the speed of sound (c) in the measurement volume (l); and

determining the injected test liquid quantity ($m(t)$; Δm) from the measured pressure values ($p(t)$) and the speed of sound (c),

in combination with the remaining limitations of the claim.

Claims 16-22 have been found to be allowable over the prior art due to the claims' dependency on claim 15.

Claim 23 has been found to be allowable over the prior art because the prior art fails to teach or suggest an apparatus for measuring the injection rate ($r(t)$) of an injection valve (3) for liquids, the apparatus comprising,

a pressure sensor (20) which is located in the measurement volume (1), the pressure sensor (20) being disposed in the pressure node of the first natural pressure oscillation of the measurement volume (1),

in combination with the remaining limitations of the claim.

Claims 24-28 have been found to be allowable over the prior art due to the claims' dependency on claim 23.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
